Education

National Chengchi University (NCCU) **Sep 2023 - Jan 2026**

M.S. in Computer Science

- Thesis: Interactive semantic segmentation for large-scale aerial Gaussian splatting.
- Advisor: Ming-Te Chi.
- GPA: 4.06/4.3

Soochow University (SCU) **Sep 2019 - Jun 2023**

B.S. in Big Data Management (Data Science)

- GPA: 3.76/4
- Capstone: Instagram restaurant-finder LINE Bot with sentiment-based ranking (team of 5).
- E.SUN Securities industry–academia program: beginner-investor risk chatbot, Winner (2021).

Fudan University **Sep 2021 - Jan 2022**

Exchange Program, School of Data Science

Work Experience

First Commercial Bank (First Bank) **Aug 2026 - Present**

AI Management Associate | Digital Banking Division

- Joined the AI Management Associate program on Aug 10, 2026, rotating within the Digital Banking Division.
- Building a monthly Power BI report on fraud-alert accounts with Python preprocessing, helping management pinpoint sources of increase.
- Benchmarked digital account-opening journeys across Taiwanese banks (UI, ID verification, resubmission); presented findings in Figma.

National Chengchi University (NCCU) **May 2026 - Jul 2026**

Project Assistant | Chinese Language Center (CLC)

- Ran three teacher-training lectures for the MOE Mandarin Proficiency Enhancement Program, from speaker invitations and hybrid logistics to hosting.
- Launched the Mandarin Buddy Program with the Office of International Cooperation and coordinated three instructors' Mandarin-teaching courses.

LINE Taiwan Limited **Oct 2022 - Aug 2023**

Business Development Intern | Social Content BD Team

- Supported business development and performance growth; owned monthly performance and traffic reporting for management.
- Increased LINE VOOM first-screen VTR by approximately 100% through content and placement optimization, sustaining results above 35%.
- Tracked performance and execution across 5+ major BD initiatives, including UBA, The Rappers 2, P. LEAGUE+, MAMA, and the LINE VOOM Creators Contest.
- Consolidated multiple reports with the data team into a centralized dashboard, saving approximately 1 hour of manual work per day.
- Evaluated creator proposals and provided tailored performance recommendations for 10+ partner creators.

Advant Analytics Tactics Ltd., AAT **Apr 2022 - Sep 2022**

Data Science Consulting Intern

- Researched and documented front-end development workflows in KNIME, covering HTML, CSS, JavaScript, Bootstrap, and reusable web nodes.
- Tested interactive web capabilities in KNIME, including jQuery UI, DataTables, carousel, and lightbox integrations.
- Built dashboard-style web templates and workflows for finance and semiconductor use cases, turning data outputs into interactive visual presentations.
- Created internal reference materials and demos to help streamline future KNIME web development and experimentation.

Projects

Interactive Semantic Segmentation for Large-Scale Aerial 3D Gaussian Splatting *(Individual)*

- Post-hoc semantic 3DGS editing for large-scale aerial scenes without retraining.
- Enables interactive labeling and open-vocabulary queries with real-time rendering.

VanGoph Visualization *(Individual)*

- Interactive visualization project on Vincent van Gogh artworks.
- Uses image feature dimensionality reduction to cluster paintings and discover visually similar works.
- GitHub

DS Prediction of Ecommerce Transaction Fraud *(Team)*

- Machine learning project for ecommerce fraud detection.
- Uses customer and transaction data to flag high-risk activities.
- GitHub

Technical Skills

Languages	Python, R, JavaScript
Frameworks	React, Node.js, Flask API, Bootstrap, D3.js
Tools & Cloud	Git, Docker, Figma, Power BI
